Education

Sep 2016 - Jun 2020	
The Engineering College of Chengdu University of technology	Electronic Science and Technology (Bachelor)
- Third Place in CCTV National Speech Contest (2018) - School Science and Technology Innovation Star (2019)	
Sep 2023 - Present	
Camosun College	Information and computer Systems(Diploma)
- AWS Certified Solutions Architect - Associate(2024) - Dean's Hornor Roll (2024, 2025)	

Project experience

Rocket Drone(https://www.rocketdrones.com)
- Rebuilt the Learning Management System (LMS) for the website from the ground up. - Utilized Agile methodologies and implemented a CI/CD pipeline to ensure efficient development.
Gorilla Note(Full Stack with ChatGPT) - https://goat-notes-basjs5e45-leechowcas-projects.vercel.app
- It's a Web app for taking notes. Users can AI questions in real time about the note content. - Developed with Next.js, Supabase, ShadCN, Prisma, ChatGPT API and deployed on Vercel.

Internship experience

AB Maker (April 2025 - Present)	Full Stack Developer
- Drafted Database Schema using excalidraw based on Figma UI design. It includes creating tables based on the business logic, adding column properties to the table and mark relationships between different tables - Collaborated with other teammates to implement Figma UI design using Trello and GitHub. Code review other teammates work before merging a PR to the main branch - Developed React components to implement Figma UI design. e.g. created QuizBuilder, SingleSelectQuestion, ImageMatchQuestion and OpenEndedQuestion components,and then use QuizBuilder component to build a quiz with three other components. Created the TS Type files based on the table structure	

Work Experience

PAX Global Technology (May 2023 - Aug 2023)	Python Engineer
- Developed Python scripts (pandas, numpy) to automate the analysis of company expenses, revenue trends, and reimbursement patterns, reducing manual reporting time by 30%. - Cleaned and transformed raw financial data (purchase orders, delivery logs) into structured formats for monthly KPI dashboards using Python, enabling data-driven cost optimization.	
PROITAV Technology Limited (Sep 2022 - May 2023)	Python Engineer
- Assisted senior analysts in building interactive dashboards (Plotly, Matplotlib) to visualize sales trends - Wrote SQL queries to extract and transform data from company databases for analysis - Helped maintain Python scripts for processing 100K+ records of transaction data weekly	
Dezan Shira & Associates (Oct 2021 - Sep 2022)	Financial Analyst
Interpreted complex domestic tax policies and accounting standards for international stakeholders, translating regulatory data into actionable insights. For example, analyzed cross-border service transactions and calculated taxable income using approved profit margin rates, ensuring compliance with local tax codes.	

Developer Skills

JavaScript(TS, Node,React,Next.js,express, Styled Component & Bootstrap)	Oracle, Postgre, MySQL and MongoDB
Python, Django, Flask,Socket, Multi-threading, Async	C++, Java, REST API, Git, Docker, Excel and Many More
